SWAN CUBE

SUSTAINABLE MODULAR LANDSCAPING

Green galvanized steel 8-10 mm, with plastic bag for substrate holding and irrigation with PLANTSAVA 25 L.

60x60x70 cm. Substrate volume 270 l.

Swan Cube provides beauty and colour to the location they are placed on having an easy maintenance. They can be used to create flowered hedges, temporal fences, etc They can be piled up to three levels, therefore can help to create vertical gardens. They come with capillary irrigation elements.

They can be used to zoning, separation, temporal decoration, landscaping on paved areas. They provide chromatic and texture variation throughout the year, changing species used.

SWAN CUBE WITH PLANTSAVA TANK
