## SWAN SHIP SUSTAINABLE MODULAR LANDSCAPING

Green galvanized steel 8-10 mm, with plastic bag for substrate holding and irrigation with PLANTSAVA 24 L.

Length 1.30 m, Width 39/25 cm and Height 35.3 cm.

Substrate volume 120 l.

Swan ship provides beauty and colour to the location they are placed on having an easy maintenance. They can be used as an element of singular colour in smaller spaces than the one decorated with Swan Ball Flower Trees. Also they can be placed in medians, narrow and long flowerbeds, creating coloured barriers continuous or alternate depending on its placement. They can be used either to create beautiful flower composition in balconies.
